HARRIETVILLE COMMUNITY FEEDBACK:

Summary of key feedback received during the second round community consultation in February 2021 (not including all detailed comments received):

01. Rethink the use of yellow colour for signage and shelters - considered too bright and should be more subdued / subtle golden tones. Branding preferred as 'mountain village' rather than 'historic Harrietville',

02. Reconsider parking layout at Feathertop Track / Tronoh Dredge Hole area to limit capacity, discourage caravans, allow for mini buses. Seal road surface to Tronoh Dredge Hole. Reduce number of shelter structures proposed in adjacent parklands,

03. Rethink the logistics and suitability of Pioneer Park log cart relocation (mixed responses received), and

04. Consider drainage infrastructure rectification and undergrounding of powerlines along GAR.

(Nominated project study area in colour)

Design evolution, changes and responses noted on pages 2 and 3.

LEGEND

RESPONSES AND CHANGES:

Items updated directly as a result of community feedback received and design evolution process:

01. Gold / yellow signature colour:
. Entry signage and shelter structure colour intensity reconsidered,
. Muted dark gold or bronze colours proposed, replacing bright yellow,
. Introduction of timber ply panels to main shelter ceiling, and
. Entry sign tagline now 'Mountain Village', not 'Historic Harrietville'.

02. Feathertop Track / Tronoh Dredge area:
. Carpark numbers reconsidered, informed by traffic count data, engineering input and survey,
. Caravans actively discouraged from entering carpark, bike trailers and mini busses permitted,
. Reorientation of carpark direction to provide single access point, circulation improvement and allowance for peak demand overflow to eastern grassed areas, and
. Shelter structure numbers reduced and shade tree plantings added.

03. Pioneer Park / Tavare Park:
. Carparking added to Tavare Park north-east frontage along Feathertop Track,
. Pioneer Park vehicle movements and bus stop location reconfigured following engineering input,
. Bollards added to deter vehicle access along Ovens River track, and
. Fitness Station added.

RESPONSES AND CHANGES:

(continued)

04. Other items / design progression:
. Signage hierarchy resolved, identifying 4 categories of messaging and information (pages 6 and 7),
. Minor adjustment to main shelter roofline to increase cover and improve forms,
. Identifying ongoing timber maintenance regime (staining or weathering approach),
. Materials and finishes proposed (page 7),
. Lighting strategy proposed (page 8),
. Planting strategy proposed (page 9),
. Likely construction costs determined (page 10), and
. Potential staging / delivery sequence strategy added (page 11).

Items not changed:
. Log cart location retained,
. Redevelopment of 'paddock site' as town centre,
. Additional shelters / covered structures in Tavare Park for markets, and
. GAR powerline undergrounding, included as potential future project at this stage.

INDICATIVE CONSTRUCTION STAGING

STAGE 1

. 1A

Adjustments to Feathertop Track intersection and sealing first section of road towards Tronoh Dredge Hole.

. 1B

Tronoh Dredge car-parking, plantings, trailhead and footpath connection works.

STAGE 2

. 2A

Pioneer Park and entry signage works (north and south) + Park landscape upgrade works including toilets, shelters, picnic facilities, car parking, pathways, planting, lighting, signage, etc.

. 2B

Tavare Park landscape upgrade works including shelters, picnic facilities, planting and car parking upgrades etc.

STAGE 3

Community Centre upgrade landscape works and carparking

STAGE 4

Feathertop Track footpath extension

POTENTIAL **STAGE 5** (approximate extent shown)

Undergrounding of HV power lines in town centre and from northern approach to avoid need for yearly tree pruning maintenance.

NOTE: if budget permits, construction of the works in a single stage would be the most cost effective way of completing the works.
