

ISSUES / POTENTIAL PROJECTS

- (A) ARRIVAL EXPERIENCE
  - Potential to create a strong 'sense of arrival' through entry signage elements announcing entry to the town centre.
- (B) LINKAGES + CONNECTIONS
  - Opportunity for improvements to pedestrian safety at key crossing points identified as town 'heart', through traffic calming measures.
  - Opportunity to increase the prominence of Pioneer Park from Highway by improving visual and physical links. Potential to reconsider height of physical barriers, reducing retaining wall extents and providing DDA compliant ramped access into Park.
- (C) PIONEER PARK UPGRADES
  - Opportunity to create a centralised 'focus' for the Park and a consolidated central gathering area for events and recreation.
  - Potential for addition of shade trees, creating a consistent planting theme and adding peripheral planting.
  - Playground expansion could orientate towards the central space and incorporate natureplay elements.
  - The Scout Hall could be refurbished as a community-use facility and opened south to face the plaza.
  - Opportunity to ensure that any adjustment to elements within the park and surrounding amenities face towards the centralised plaza space.
  - Potential to expand toilets into vacant clubrooms.
  - Potential to unify furniture + signage to create consistent identity.
- (D) STREETScape IMPROVEMENTS
  - Opportunity to create a consistent street tree planting theme to define and highlight the town centre, provide continuous footpath connection to eastern side and improve unsightly batter treatments.
  - Consider encouraging canopy tree planting within private lots to improve overall streetscape aesthetic.
- (E) MT BOGONG IDENTITY REINFORCEMENT + LOCAL REFERENCES
  - Explore meaningful associations, interpretive information, cultural associations referencing Mt Bogong, high country stockmen, etc.
  - Potential to insert a physical viewline reference marker within Pioneer Park looking towards Mt Bogong.

Red dots indicate individual community comments received during Zoom webinar session on 16.07.2020 or subsequent feedback provided. Black dashed lines represent proposed project boundaries. Individual project items are listed in red.

Where to from here...?  
 Site feature surveys will be undertaken, then draft detailed concept plans will be prepared by MDG to propose the aesthetic direction and functional outcomes of the selected project areas. This information will then be reviewed with the community once complete to seek further comments and support prior to finalising.
